Chargemaster - Supplies
December 2022
The file posted here reflects charges for items and services provided by Anne Arundel Medical Center as of January 1, 2023. This type of file is commonly referred to as the hospitals "charge master." In Maryland, the Maryland Health Services Cost Review Commission (HSCRC) regulates the average rate for hospital services.

Though the HSCRC sets rates as of a certain date, hospital charges are allowed to fluctuate during the course of the year, and detailed charges for certain items may be different than the average approved rate that covers a larger group of services. This is both permissible and normal as hospitals adjust charges frequently to comply with other HSCRC regulations.
