

## Behavioral Health Walk-In Urgent Care at Luminis Health

Luminis Health's behavioral health pavilion in Lanham connect patients **ages 4 years and up** to walk-in urgent care services for people needing non-emergency, non-life-threatening behavioral health care.

This service is unique in Prince George's County. We can evaluate and help connect patients to resources, including therapy and medication.

### **Our services can be a valuable resource for anyone experiencing:**

- Moderate to severe psychiatric symptoms that need to be addressed in less than 24-72 hours
- Increasing symptoms of depression, anxiety, substance use
- Decreased effectiveness of medication
- A need for medication management for patients who currently don't have a provider or whose provider is temporarily unavailable

Patients will receive a mental health evaluation by a Mental Health Clinician or Psychiatric Nurse Practitioner based on the patients' needs. Patients in crisis (danger to themselves or others) or medically unstable will be referred to the emergency department. Patients needing ongoing services will be referred to the Lanham Behavioral Health Clinic or a community partner based on need.

**To refer a patients call  
(301) 623-4350**
